

**Doug Sutherland**  
Commissioner of Public Lands

April 25, 2006

The Honorable Chris Endresen, Chair  
Kitsap County Commissioners  
614 Division St MS: 4  
Port Orchard, WA 98366

Subject: Projection of Income from State Forest Lands

Dear Commissioner Endresen *Chris*

The Department of Natural Resources (DNR) manages about 8,150 acres of state forest lands (formerly known as forest board lands) that benefit Kitsap County. As the attached report shows, in the first two months of calendar year 2006, these lands generated \$10 thousand and are projected to generate \$30 thousand in calendar year 2006. This represents an increase of \$10 thousand from the 2006 projection in the January 2006 report.

Most of this income is from timber sales. Timber markets, supply concerns, contract requirements and regulatory requirements influence when timber purchasers choose to harvest. The revenue projections rely on purchasers' plans for harvest and may change in future reports if those plans change.

The next projection of state forest land revenues will be available in July 2006. In the meantime, if you have questions about this report, contact Randy Acker, South Puget Sound Region Manager. Randy can advise you of possible fluctuations in timber harvest and provide information on DNR management programs and activities in you county. Randy can be reached at 360.825.1631.

Sincerely,

*Doug*  
Doug Sutherland  
Commissioner of Public Lands

## **County Income Report April 2006**

Income from management activities on state forest lands is designated for allocation to several taxing districts in each county, depending upon the location of the activity in that county. Only a very small amount is available for discretionary use by the county.

Revenue from state forest lands (formerly known as forest board lands) come primarily from harvested timber. Lease activities and rights-of-way applications provide additional sources of revenue. Another source of revenue to the counties is leasehold tax returns, which will vary with the amount of lease activity in any given year.

**Table 1** shows the annual revenue for each county from calendar year 1996 through calendar year 2006. As is evident in Table 1, total revenue varies considerably from year to year. Many of the key variables responsible for high revenues in one year can also lead to reduced income the following year.

Revenue projections for each of the 19 counties with state forest lands were made for the calendar year 2006. **Table 2** includes the summary of all timber harvest projections listed in Table 2A, and is combined with an estimate of additional revenue from leases, rights-of-way applications, and other activity on state forestlands. **Table 2A** presents projected revenue for each timber sale on state forest lands.

**Table 3** presents the volume and net value under contract as of March 31, 2006 that is not currently scheduled for harvest until after December 2006.

These projections were developed by Department of Natural Resources' region staff who contacted each timber sale purchaser with sale rights, to determine approximately how much and when they planned to harvest the timber in each sale.

Projections for each sales anticipated harvest should be considered a rough estimate only, as actual removal activity depends on individual sale characteristics (species, volume, location, etc.), combined with outside market factors as determined by each purchaser.

The schedule of future state forest land timber sales in your county is available upon request from Department of Natural Resources' region staff.

**Table 1. Revenue to Counties from State Forest Transfer and Purchase Lands (Calendar Years)**

Note: Revenue is received daily by the Department of Natural Resources for activities on State Forest lands and deposited daily at the Office of State Treasurer. Effective February 1998 these monies are remitted to each county via wire transfer a minimum of four times per month.

Due to the specific date monies are received by the Department and the cutoff dates used by the State Treasurer for wire transfers, the revenue for the current period may be different than actual remittances to date.

*\*Due to system conversion of agency revenue system, only actuals for 2 months are available for this quarterly report.*

<sup>1/</sup> Normally, counties receive 78 percent of State Forest land Transfer revenues and 26.5 percent of State Forest land Purchase revenues.

**Note:** The sales represented here are currently under contract as of **March 2006**. This timber could be harvested at any time depending on market conditions and business needs as determined by each purchaser. Sales to be sold in the future could provide additional revenue to your county. Department of Natural Resources' region staff should be contacted concerning future sale activity and dates.
